LEARNING TODAY,
LEADING TOMORROW

HOW DOES AI WORK?

AI follows simple steps to
learn, **understand** and **help** us.
Let's see how it works!

THE 5 SIMPLE STEPS

1 COLLECT DATA

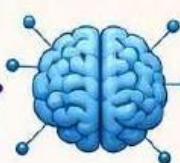

AI collects lots of
information called
data.

2 PROCESS DATA

AI looks at the data
and finds patterns
and rules.

3 LEARN

AI learns from the
patterns to become
smarter.

4 MAKE DECISIONS

AI uses what it
learned to make
decisions.

5 HELP US

AI gives useful
answers or helps
us in daily life.

EXAMPLE: AI RECOMMENDING A VIDEO

1 You watch many videos.

2 AI checks what you like.

3 AI learns your interests.

4 AI finds videos you may like.

5 It shows the best videos for you!

THINK & WRITE

Put the steps in the correct order by writing
numbers 1 to 5 in the boxes.

- ☐ AI learns from the patterns.
- ☐ AI collects lots of data.
- ☐ AI gives useful answers.
- ☐ AI looks at the data.
- ☐ AI makes decisions.

THINK LIKE VARNIKA

If AI follows these 5 steps,
what new things do you think
it can help us do in the future?

Write or draw your ideas!
